

Analysis of Economic History.

Most can't handle that type of discussion.

Those who complain about inequality of result simply want to redistribute wealth and gain immense power for themselves.

**They proclaim themselves the protector of the disadvantaged.
The leaders who care!**

In reality, Free market principles provide the cure for poverty.

Hard work and education, when utilized in a Free Enterprise System, have taken more people out of poverty than any other system—including all of the Great Society Programs since the 1960s.

The attack on us is not just that we do not care about the underprivileged.

The attack is that we are against certain groups of people.

In other words, their plan of action is to “Divide and Conquer.”

As members of the SREC, we've learned important intel in the new war called “Battleground Texas.”

The Democrats know they must take Texas, because if they ever win Texas we will not have another Republican President for the next 50 to 100 years!

They used 3 words to hurt us in 2008 & 2012.
“Hope and Change”

As a result, we have

Obamacare

Trillion Dollar Debts

Stagnant employment and more poverty

In 6 months, we will face the greatest threat to world peace in the 21st Century as Iran restarts its nuclear program.

Now, even they know that they cannot win on “hope and change.”

Do you know their new battle cry? “War on Women”

Use for Wendy Davis Campaign

Use for Hillary’s Campaign.

Abortion—Wendy Davis’ Claim to fame—kills little girls

Obamacare—makes it hard for women to provide health care for their families

Trillion \$ debts, higher taxes—hurt working women

Higher regulations—hurt business owned by women

Poverty and unemployment—hurt women

Major war in Middle East—would kill and hurt women.

As a man, I can make the argument. However, the defense of women is best made by Republican women like you.

This is a message that Republican Women must give if we are to save our state and nation.

We have facts on our side to show that we are not against women. Even locally, look at the women who have been elected as Republicans/

Look at the women who have been appointed by Republican Governors to various positions of authority.

Without Republican Women, we would not be able to get anyone elected. And I thank you for your dedication and service.

Women, in our response to Battleground Texas, we will call upon you to help us keep Texas Red.

Sometimes I wonder those who call themselves Conservatives often use Divide and Conquer techniques.

Over the past 8 to 10 years, we have seen an influx of many people who stayed away from mainline politics.

They love this country, and they have many excellent ideas to solve our nation's problems.

However, I sometimes hear certain individuals—proclaiming to be the “most conservative” or the “most pious” violating Reagan’s 11th Commandment: Never say a negative word about a fellow Republican.”

We can have differences in a Republican Primary—as it should be. But we come together.

So often, I hear complaints about our Republican leaders, yet I don't hear them complain about Obama, Pelosi, or Reed.

Who is the real enemy?

Good news, as I serve my eighth year, I am so proud to see a sense of unity on the SREC, like I've never seen before.
